Stain Remover.
 It is sometimes difficult to keep the kitchen paper free from grease stains. They may be removed entirely if a mixture of pipe clay and water made the consistency of cream is spread over them and allowed to remain overnight. In the morning it should be removed with a clean brush or cloth.

Rings in History.
 Signet rings are mentioned in the
 Bible, and we find the ring in those
 days, to have been a sign of honor as
 it is with us. During the war a lover
 who wished to specially honor his
 bride sent the gold money to the gold-
 smith with which to fashion the wed-
 ding ring, for in those days the heavier
 and broader the band the better, and
 girls used to measure the width and
 "heft" the circles to see whose was
 the broadest and heaviest, and there-
 by establish a social standing unim-
 peachable.

Beets as Fertilizers.
 An explanation of the improvement
 of European agriculture in recent
 years has been sought, and in Ger-
 many it is attributed to soil stimula-
 tion from beet culture. From the
 books of eight scattered estates where
 beets have been grown for sugar, Dr.
 Lillenthal finds an increase in the
 yield of wheat of 5.95 bushels per
 acre; rye, 1.59; barley, 6.51, and oats,
 5.77. Cattle have increased, and the
 net income has been raised by as
 high as 70 per cent.

The readers of this paper will be
 pleased to learn that there is at least
 one dreaded disease that science has
 been able to cure in all its stages,
 and that is Catarrh. Hall's Catarrh
 Cure is the only positive cure now
 known to the medical fraternity. Catarrh
 being a constitutional disease, requires
 a constitutional treatment. Hall's
 Catarrh Cure is taken internally, act-
 ing directly upon the blood and the
 mucous surfaces of the system, there-
 by destroying the foundation of the
 disease, and giving the patient more
 strength by building up the constitu-
 tion and assisting nature in doing its
 work. The proprietors have so much
 faith in its curative powers that they
 offer One Hundred Dollars for any
 case that it fails to cure. Send for
 list of testimonials.

Life is a Compliment.
 I have an abiding faith that a false-
 hood never hurts anyone but him who
 propagates it. It is also my conviction
 that no man can pay a much
 greater homage to another than to
 deliberately misrepresent him. It is
 a cowardly confession of weakness
 and of inferiority.—John Bigelow, in
 "Retrospections of an Active Life."

**REMARKABLE CURE
 OF DYSENTERY.**

"I was attacked with dysentery
 about July 15, and used the doctors'
 medicine and other remedies with no
 relief, only getting worse all the time.
 I was unable to do anything and my
 weight dropped from 145 to 125
 pounds. I suffered for about two
 months when I was advised to use
 Chamberlain's Colic, Cholera and Di-
 arrhoea Remedy. I used two bottles
 of it and it gave me permanent relief."

Altogether Too Successful.

 should say he has! I'm paying him

COSTLY TREATMENT.

"I was troubled with constipation
 and indigestion and spent hundreds
 of dollars for medicine and treat-
 ment," writes C. H. Hines, of Whitlow,
 Ark. "I went to a St. Louis hospital,
 also, to a hospital in New Orleans, but
 no cure was effected. On returning
 home I began using Chamberlain's
 Tablets, and worked right along. I
 used them for some time and am now
 all right." Sold by all dealers.

EFFICIENT DRY MASH HOPPER

Design and Dimensions Illustrated
 Are Result of Considerable Experi-
 menting—Easily Made.

In response to a query for a dia-
 gram and description of an inside
 dry-mash hopper a writer in the Rural
 New Yorker makes the following re-
 ply:

The accompanying diagram shows
 an end view, or cross section, of a
 dry feed hopper designed to prevent
 the waste of food. The design and
 dimensions are the result of consid-
 erable experimenting, and the hoppers
 are very satisfactory, both for young

Dry Mash Hopper.

chickens and older fowls. The one
 shown will hold a bushel of feed and
 is used in a colony house for growing
 chicks; for older fowls it should be
 several times as large, keeping the di-
 mensions of the feed opening the
 same, however. One used in my hen-
 house holds 200 pounds of feed and
 is filled at irregular intervals as it
 becomes empty. They may be built
 of any stuff at hand, though mine are
 made of one-inch pine boards for ends,
 and half-inch matched stuff for the
 rest.

FEED CHICKENS IN SUMMER

There Are Few Farm Flocks That Will
 Not Improve in Egg-Laying If
 Given Some Grain.

The very common opinion that
 farm flocks need no grain feed in
 summer is seldom warranted. The
 farm range is valuable, and there is
 no place where eggs can be produced
 as economically, but there are few
 flocks that will not improve in egg
 yield if given at least one feed daily.
 It ought not to be difficult to de-
 termine whether more feed is needed.
 Something depends on the size of the
 flock and the range, but the egg yield
 will tell. There is only one probable
 explanation for a farm hen's failure
 to lay eggs in summer, and that is
 lack of feed. Occasionally it is due to
 a lack of the right kind of feed, but
 generally if the hens have one feed
 daily of any grain they will give good
 results.

Wheat, barley and oats are the
 practical summer grains, but if a little
 corn is used and some meat, corn is
 very good. Whatever grain is used it
 is genuine economy to give the hens
 access to dry bran. An open shallow
 box will do if you haven't time to make
 a regular feed hopper. No poultry-
 man or farmer is feeding to the best
 advantage who does not feed bran.

POULTRY NOTES

Eggs not gathered once a day now
 are of doubtful quality.
 Do the birds have shade in an open,
 airy place? They need it.

Healthy breeding stock is the great-
 est requirement for strong chicks.
 The breed you like the best is the
 one you will give the most attention.
 As a source of income the hen is
 not considered as seriously as she
 should be.

There will never be too many good
 poultrymen, but we can all strive to
 be among the best.

Air-slaked lime, freely, dusted every-
 where, is cheap, and will destroy lice,
 gapes and the roup.

Feeding chicks when too young and
 too much at a time are fruitful
 sources of bowel trouble.
 A few drops of spirits of camphor
 in the drinking water will often cor-
 rect slight bowel trouble in old and
 young birds.

Fresh, clean water is necessary this
 time of the year. If you have no
 running water, change that in your
 jars at least twice a day.
 Do not neglect to chop some onions
 or onion tops for little ducks and tur-
 keys every day or two. They are re-
 lished by them and will do them much
 good.

"BLOOD IS THICKER THAN WATER"
 Without good red blood a man has a weak heart and poor nerves. Thinness of
 the blood, or avarice, is common in young folks as well as old. Especially is it
 the case with those who work in ill-ventilated factories—or those who are shut
 up indoors in winter time with a coal stove burning up the oxygen or emitting
 carbonic (oxide) gas. This blood, or blood which lacks the red blood corpuscles,
 in anemic people may have been caused by lack of good food, or by breathing into
 lungs, or by poor digestion or dyspepsia. Sometimes people suffer intense
 pain over the heart which is not heart disease at all, but caused by indigestion.
 Whatever the cause, there's just one remedy that you can turn to—knowing
 that it has given satisfaction for over 43 years.
DR. PIERCE'S
GOLDEN MEDICAL DISCOVERY
 Is a blood cleanser and alterative that starts the liver and stomach into vigorous
 action. It thus assists the body to manufacture rich red blood which feeds the
 heart—nerves—brain and organs of the body. The organs work smoothly like
 machinery running in oil. You feel clean, strong and vigorous instead of tired,
 weak and faint. Nowadays you can obtain Dr. Pierce's Golden Medical Dis-
 covery Tablets, as well as the liquid form from all medicine dealers, or tablets
